

## MOORINGSense CONSORTIUM

The consortium comprises 9 partners from Europe's key OW industry and academia, including worldwide market leaders in chains, wires and ropes, both producing hybrid solutions for the mooring lines. They will collaborate to improve the understanding of mooring lines loading and performance, including a degradation mechanism.

## MOORINGSense TECHNOLOGY

MooringSense will take advantage of mooring systems' updated condition information, provided by a Digital Twin (DT) and innovative monitoring technologies, to allow the implementation risk-based integrity management plans and more holistic control strategies to reduce OPEX and increase energy production of FOW farms..

### The world's largest floating wind turbine is already hard at work

WindFloat Atlantic is the world's largest offshore floating wind turbine. Connected to the energy grid off the Portuguese coast of Viana do Castelo, the turbine went online on New Year's Day and began harvesting energy the day after. It's a very big glimpse at the future of wind power.
